DSSSB • TGT COMPUTER SCIENCE • POST 41/26

Your 30-day plan

A three-hour core timetable, optional fourth hour, syllabus map and paper-coverage register.

30 days | 3–4 hours daily | English explanations

Prepared 20 October 2026

How to use: Attempt every question in a type before reading its solutions. Cover the answers on paper, or use the answer toggle in the HTML workbook. Redo errors after 1, 3 and 7 days.

Coverage: One section is provided for each mapped syllabus/question family. Each section places practice questions first, then worked answers and a shortcut or solving rule. Each regular Part A/B section now includes two new questions marked Additional practice. Original pattern-based expected practice is included throughout; it is informed practice, not a prediction or a claim to reproduce every historical question.

Syllabus status: The 2026 advertisement verifies the exam scheme for 41/26. The supplied 56/24 subject syllabus is used provisionally: a separate 41/26 subject-syllabus PDF was not verified. Follow any later official 41/26 notice. Exact exam date was not supplied; timetable days are relative.

Every downloaded source question

37 complete official PDFs, 8,100 numbered question entries, 7,130 original PDF pages. The companion archive includes every question from all successfully downloaded papers, with diagrams and bilingual versions preserved. An entry is a paper-and-question-number pair, not a claim that all 8,100 questions are different.

Open DSSSB_All_PYQ_Archive/index.html in the outputs folder, or extract DSSSB_All_PYQ_Archive.zip and open index.html. The page lists the full paper name and year and supplies a clickable grid of every question number. question_index.csv also records the PDF page, official URL and source name for each question.

More worked practice: 232 newly added questions: two per regular section across 50 Part A sections and 66 Part B sections. They sit with their own type, followed by worked solutions. Together with the original drills, the workbooks now have 654 worked questions, including the 40 current-affairs questions. The source archive is additional to these worked drills.

Use the sources efficiently: Practise Part A across all teaching subjects; prioritise TGT CS discipline questions, then relevant PGT CS questions. The archive also retains other-subject discipline sections to fulfil the request for every question from every collected paper. Those extra subjects do not enlarge your official CS syllabus.

> **Source limitations:** P38, the attempted third-party 2024 paper, was inaccessible (HTTP 403); no 2025 CS paper was verified. The archive preserves official printed keys, including ignored/deleted items where present. It is a complete copy of the downloaded collection, not an independently re-solved explanation of all 8,100 entries. Use the type-method solutions for approach and check disputed source keys.

Start here

Study budget: 30 days × 3 hours = 90 core hours; a fourth hour on every day gives 120 hours. The timetable starts whenever you begin. It does not assert an official exam date.

Confirmed scheme for 41/26: DSSSB Advertisement 03/2026, printed pp.30–31 specifies 200 questions/200 marks in two hours; five Part A sections of 20 marks each; Part B 100 marks including teaching methodology/B.Ed.; and -0.25 per wrong one-mark MCQ. Read the current notice for qualifying criteria: do not assume that Part A alone can compensate for a weak Part B.

Use the supplied 56/24 subject syllabus as the provisional detailed subject map. It belongs to an older post code; this workbook does not relabel it as a newly issued 41/26 document.

Core day: 180 focused minutes

Block	Minutes	Action
Part B	85	10 recall +45 question attempts/concepts +30 solution review.
Part A main topic	50	25 timed attempt +25 correction and shortcut practice.
Languages	20	10 English +10 Hindi; on language-topic days, revise the other language too.

Block	Minutes	Action
General awareness/current affairs	15	Recall and verify a small number of facts.
Error notebook	10	Record error,cause,correct rule and reattempt dates.

Optional fourth hour: 40 minutes on source-paper questions from the day's topics, then 20 minutes reviewing wrong/guessed answers. On mock days use the fourth hour for review. Short breaks are outside these focused minutes. Example split: 60 minutes morning +120 minutes evening; move clock times to suit your routine.

What counts as finishing a type?

Solve the examples without looking; explain why each answer is correct; solve two more questions from the linked paper or change the example's numbers; then reattempt after 1,3 and7 days. A chapter read is not a chapter mastered. For factual topics use recall cards; there is no reliable "shortcut" that replaces knowledge.

Priorities are recommendations, not measured frequency percentages. First secure programming/data structures,DBMS,OS,networks,digital logic,software engineering and teaching methodology. Keep languages and arithmetic daily. Give the extra subject areas a bounded first pass, then deepen those your mock errors expose. Do not spend your first week only on advanced mathematics.

Daily timetable

Codes refer to the two workbooks and current-affairs booklet. These are first-pass objectives, not a demand to master every detail in one sitting. If a day overruns, use the optional hour or a checkpoint reserve; retain error review.

Day	Part B / test	Part A / review	Daily recall
1 □	Diagnostic: 20 Part A + 20 Part B questions from P33; record time and confidence.	Review every miss; skim the type indexes. Establish your error notebook.	CA01; 10-minute English/Hindi check.
2 □	B01–B03 and B62: fundamentals, bases, codes, PC/cloud.	A01–A03: numbers, HCF/LCM, simplification.	5 English + 5 Hindi items; CA02.
3 □	B04–B06: logic, K-map, sequential circuits.	A04–A05: percentages and ratios.	Language error review; CA03.
4 □	B07–B08: architecture and memory.	A06–A08: averages, profit/loss and interest.	Revise CA01–CA03.
5 □	B09–B11: C operators, pointers and loops.	A09–A10: work, pipes, efficiency.	10 grammar items; CA04.
6 □	B12–B14: C++,Java,Python.	A11–A12: speed, trains and boats.	10 language items; CA05.

Day	Part B / test	Part A / review	Daily recall
7 ☐	Checkpoint: 50 mixed questions from P34, 30 minutes.	Spend 60 minutes analysing; redo Days 2–6 errors.	CA01–CA05 quiz; 30-minute reserve.
8 ☐	B15–B17: stacks,trees,AVL,heaps,hashing.	A13–A15: mensuration and DI.	Language recall; CA06.
9 ☐	B18–B19 and sorting part of B63.	A16–A18: series,analogy,coding.	Language drill; CA07.
10 ☐	B20–B21: keys,ER,normalisation.	A19–A21: family,direction,ranking.	10 language items; CA08.
11 ☐	B22–B23: SQL,transactions,indexes.	A22–A23: arrangements,syllogisms,Venn.	CA09–CA10; English passage.
12 ☐	B24–B25 plus round robin in B63.	A24–A26: logical statements and operators.	Hindi passage; current-affairs recall.

Day	Part B / test	Part A / review	Daily recall
13 □	B26–B27: memory,deadlock,disks.	A27–A29 and A50: clocks,figures,cubes.	Language error drill; revise oldest CA cards.
14 □	Full mock 1: P35, 120 minutes.	60-minute review: all wrong,guessed and slow questions.	Optional fourth hour: finish review.
15 □	B28–B30: layers,protocols,subnetting.	A30–A32: English grammar and vocabulary.	15-minute Hindi; current-affairs update.
16 □	B31–B33: transmission,security,Linux.	A33–A35: English idioms,ordering,passages.	15-minute Hindi; CA revision.
17 □	B34–B36: software engineering,testing,projects.	A36–A38: Hindi grammar.	15-minute English; CA update.
18 □	B37–B40: HTML,CSS,JavaScript,XML,.NET.	A39–A41: Hindi vocabulary,structure,passages.	15-minute English; CA revision.

Day	Part B / test	Part A / review	Daily recall
19 □	B41–B43: graphics,multimedia,mobile.	A42–A43: history and polity.	Both languages; CA update.
20 □	B44–B46: e-commerce,MIS,business communication.	A44–A45: geography and science.	Both languages; CA quiz.
21 □	Full mock 2: P36,120 minutes.	60-minute review; compare accuracy and time with Day 14.	Optional fourth hour: finish review.
22 □	B47–B50 and B65: accounting,economics,physics.	A46–A47: economy,organisations,culture,sports.	Both languages; CA update.
23 □	B51–B53: sets,matrices,calculus,statistics.	A48–A49: partnership,mixtures,algebra.	Both languages; formula recall.
24 □	B54–B56 and B66: probability,distributions,numerical methods.	15 timed arithmetic +15 reasoning items; analyse misses.	B57 reserve only after core errors; CA recall.

Day	Part B / test	Part A / review	Daily recall
25 □	B58–B61 and B64: teaching methods,assessment,flowcharts.	AP1 and BP1 verified PYQ bridge; redo language errors.	CA mixed statement practice.
26 □	Full mock 3: P37,120 minutes.	60-minute review; isolate top five fixable weaknesses.	Optional fourth hour: finish review.
27 □	Repair top five weaknesses; redo without seeing solutions.	Mixed 30 A +30 B questions from source papers,36 minutes.	CA40 quiz; close formula gaps.
28 □	Full mock 4: P28,120 minutes.	60-minute review. Expect a different topic order/style from 2021.	Optional fourth hour: finish review.
29 □	Closed-book formula,ports,SQL,logic,OS and pedagogy recall.	Reattempt error notebook; update date-sensitive CA facts.	Confirm admit-card instructions and travel arrangements.
30 □	Light revision: strongest scoring topics + stubborn errors.	One short mixed set only if useful; no full new syllabus chapter.	Sleep and exam preparation; stop heavy study early.

Mock-test method and error notebook

The official PDFs display answers in colour. For a mock, cover the options' correctness marks where possible, or have someone print a clean question view. Because several examples in this workbook come from the same papers, these are timed practice papers, not guaranteed unseen score predictors.

Starting time budget, if the live exam permits free switching: languages 20 minutes total; GA 10; reasoning 15; arithmetic 20; Part B 45; final checks 10. This totals 120 minutes. Adjust after mocks. If official sectional timers/navigation apply, follow those instead.

Score: correct -0.25×wrong. Example: 150 correct,30 wrong,20 blank gives 142.5. Track accuracy=correct/attempted, not merely attempted count. Minimum qualifying marks and competitive selection cutoffs are different.

Under +1/-0.25 marking, answering has positive expected score when your probability of being correct exceeds 20%, ignoring time cost. This is not a reason to spend time on blind guesses while solvable questions remain. Eliminate options using evidence and move on from time traps.

Date / code	My answer	Error cause	Correct rule	Redo D+1,D+3,D+7
_____	_____	Concept / calculation / reading / time	_____	□ □ □
_____	_____	Concept / calculation / reading / time	_____	□ □ □
_____	_____	Concept / calculation / reading / time	_____	□ □ □
_____	_____	Concept / calculation / reading / time	_____	□ □ □
_____	_____	Concept / calculation / reading / time	_____	□ □ □
_____	_____	Concept / calculation / reading / time	_____	□ □ □
_____	_____	Concept / calculation / reading / time	_____	□ □ □

Checkpoint rule: If you cannot explain a wrong answer, return to its concept. If you can explain it but calculate slowly, do a short timed drill. If accuracy is good but attempts are low, practise selection and skipping. Redo guessed-right items too. Targets such as 80% drill accuracy are learning targets, not official cutoffs.

Daily completion tracker

Days 1–10: □ □ □ □ □ □ □ □ □ □

Days 11–20: □ □ □ □ □ □ □ □ □ □

Days 21–30: □ □ □ □ □ □ □ □ □ □

Mapping all 32 subject headings

Every heading in the supplied subject PDF has a destination below. Mapping a heading is not a claim that every possible subtopic or question under that heading has been exhausted.

No.	Supplied subject heading	Workbook units	Scope
1	Mathematics I–IV	B51–B57,B66	Broad heading; representative drills, not an exhaustive four-semester course.
2	Business communication,organisation,management,writing	B46; A30–A35	Includes agenda/minutes and managerial functions.
3	Computer basics and PC software	B01–B03,B62	PC shortcuts and spreadsheet reference types.
4	C,data structures,C++	B09–B12,B15–B19,B63	Include tracing,not just definitions.
5	IT fundamentals	B01,B28–B33,B62	Hardware,networks,cloud/security basics.
6	Basic physics	B50,B65	Electricity,forces,fluids,elasticity.
7	Digital electronics	B03–B06	Codes,gates,K-maps,counters.
8	DBMS	B20–B23,B64	SQL,keys,normalisation,transactions.
9	Computer architecture	B07–B08	Addressing,cache,CPU performance.
10	Front-end design tools	B37–B39	Structure,styling,events,legacy vocabulary.
11	Financial accounting	B47–B48	Equation,entries,depreciation,reconciliation.
12	OOP/numerical techniques	B12–B14,B56,B66	Both portions included.
13	Software engineering	B34–B36,B64	Lifecycle,testing,metrics,reliability.
14	Java and website design	B13,B37–B39	Bytecode,exceptions,web technologies.
15	Operating systems	B24–B27,B63	Scheduling,memory,deadlocks,disks.
16	Business economics	B49	Elasticity,cost,banking concepts.
17	Computer networks	B28–B31	OSI,TCP/IP,subnetting,transmission.
18	.NET programming	B40	CLR,CTS,CLS,JIT,WPF,data binding.

No.	Supplied subject heading	Workbook units	Scope
19	Linux environment	B33	Commands,permissions,redirection.
20	E-commerce	B44	Business and payment models.
21	Design/analysis of algorithms	B15–B19,B63	Complexities,traversals,sorting,graphs.
22	Network security	B32	CIA,signatures,certificates,phishing.
23	Management information systems	B45	TPS,MIS,DSS,expert systems.
24	Mobile computing	B43	Wireless,handoff,agents,sensors.
25	Graphics,multimedia,curves,surfaces,solids	B41–B42	Transforms,clipping,Z-buffer,Bézier,CSG.
26	Internet programming and listed legacy web topics	B37–B40	DTD,parsers,IIS/PWS,data binding; brief legacy coverage.
27	Knowledge management/new economy	B44–B46	Tacit/explicit knowledge and digital business.
28	Foundation English	A30–A35; B46	Grammar,comprehension,communication.
29	Problem solving/programming	B09–B19,B63–B64	Tracing,algorithm choice,flowcharts.
30	Statistics,probability,distributions,inference	B53–B55	Includes Bayes and inference basics.
31	TCP/protocols	B28–B31	Protocol roles,ports,reliability.
32	Interpolation	B56,B66	Linear,Lagrange,Newton finite differences.
Additional	Teaching methodology from Part A/B scheme PDF	B58–B61	Do not omit it because it is absent from the 32-line CS list.

Past-paper coverage and limits

37 official paper files retrieved; 10 selected files used for the question-format review. The review used extracted text from five 2021 CS papers, OCR of the 2023 CS paper and Part A pages from four 2018 TGT papers (Hindi,Maths,Natural Science,Social Science). OCR can miss diagram labels and Hindi glyphs; it was not used to invent missing questions. This is not a full manual answer audit of all 37 files.

> Additional retrieved papers are indexed for follow-on practice, not counted as analysed evidence. A third-party 2024 CS download failed; no verified 2025 CS paper was retrieved. The public archive can be incomplete and some index pages were empty. Consequently, neither “all previous papers analysed” nor an exact all-years topic frequency can honestly be claimed.

Observed useful distinction: The 2021 CS files combine repeated short definitions, statement checks and numerical/code traces. The 2023 CS file also includes Python and a broad mixture of business,physics,web and security topics. Q191–200 forms a teaching-methodology block in the reviewed CS files; this observation does not guarantee a fixed ten-question quota in 41/26.

Question/key cautions: P33 Q28,Q125,Q176 and P36 Q107,Q108,Q119,Q126,Q176 are examples explicitly marked ignored in their official files; P37 Q176 is another. P35 Q111 uses an unsequenced C expression that should not be treated as a portable numeric-output example. Use the final official key for historical scoring and sound subject rules for learning.

Selected question routes

Type	Official questions to attempt after the workbook
Percentages/profit/work	P33 · TGT Computer Science 2021 file 1 (2021) Q47–55; P35 · TGT Computer Science 2021 file 3 (2021) Q46–55
Reasoning and figures	P28 · Question Paper for Post: TGT Computer Science, Post Code: 39/22, Date: 24.06.2023, Shift-2 (2023) Q1–20; P33 · TGT Computer Science 2021 file 1 (2021) Q21–40
English grammar/vocabulary/passage	P35 · TGT Computer Science 2021 file 3 (2021) Q81–100
Hindi grammar/comprehension	P35 · TGT Computer Science 2021 file 3 (2021) Q61–80 (view PDF; text extraction is imperfect)
Static GA and contemporary facts	P33 · TGT Computer Science 2021 file 1 (2021) Q1–20; P28 · Question Paper for Post: TGT Computer Science, Post Code: 39/22, Date: 24.06.2023, Shift-2 (2023) Q21–40; P09 · TGT MATHS FEMALE 22nd September 2018 Shift 1 (2018) Q21–40
C and data structures	P34 · TGT Computer Science 2021 file 2 (2021) Q110–118; P37 · TGT Computer Science 2021 file 5 (2021) Q110–117
Digital logic	P33 · TGT Computer Science 2021 file 1 (2021) Q128–134; P34 · TGT Computer Science 2021 file 2 (2021) Q126–139
OS	P33 · TGT Computer Science 2021 file 1 (2021) Q158–164; P34 · TGT Computer Science 2021 file 2 (2021) Q152–158

Type	Official questions to attempt after the workbook
Software engineering	P34 · TGT Computer Science 2021 file 2 (2021) Q143–149; P36 · TGT Computer Science 2021 file 4 (2021) Q140–147

After this workbook

Use official papers for volume: this pack teaches representative types but does not list and solve every historical question. For deeper gaps use NCERT school mathematics/science/social science and standard undergraduate CS references. Avoid building a large new resource collection during the final month.

> Your next action today: attempt the diagnostic, write down your three weakest areas and begin Day 2's material. Keep all five Part A sections in rotation while protecting daily Part B time.
